

ARE TRADE AND TRANSACTION REPORTING REQUIREMENTS SLOWING YOU DOWN?

It's no secret, Europe and the U.K. have some of the most onerous transaction reporting requirements on the planet. Regulations ranging from EMIR, MiFIDII/ MIFIR and SFTR to FinfraG, are forcing firms to divert time and resources, while increasing the risk of fines, sanctions and reputational damage.

Fortunately, there is a way to save time, cut costs and maintain compliance. Take this quick survey to see if you're ready for a better reporting solution.

HAVE WORKLOADS INCREASED DUE TO NEW COMPLEXITIES IN COMPLIANCE REQUIREMENTS?

Stop relying on costly manual processes to comply. Achieve efficiency and effectiveness in trade and transaction reporting with a fully automated, end-to-end solution.

DO YOU HAVE OPERATIONAL EFFICIENCIES IN PLACE TO OVERCOME THE SITUATION?

Doing nothing gains nothing. Examine how your reporting operation collects, translates, validates and submits reports and start closing the gaps with purpose-built technology.

IS YOUR SYSTEM BUILT TO MITIGATE INACCURACIES AND RISING COSTS?

Automate error handling and strive for comprehensive end-of-day reports so you can manage exceptions and prioritize on what matters.

ARE YOU MINIMIZING REPORTING AND TRANSACTION FINES AND FEES?

Adopt a system that covers all asset classes and efficiently complies with requirements of multiple regulatory jurisdictions.

IS YOUR SYSTEM TRANSPARENT AND EASILY ADJUSTABLE TO UPCOMING CHANGES?

Overcome siloes with cloud-based access to data regardless of source and leverage a high-level programming language like Python to increase scalability, adaptability and security.
